"For my dream project I'd like to fuse two of my passions: design and football. From the design of the crest to the kits to the signage and way-finding inside and outside of the stadium. The possibilities to make your mark seem endless. Incorporating the unique visual heritage of an old club into something new and refreshing would be a challenge I'd love to take on."

120→123: **AZ St. Lucas Hospital Parking Tower**, 2015. Signage and Wayfinding.

Signage & wayfinding system for the AZ St. Lucas hospital parking towers in Gent, Belgium. The clear and simple icon set was created to fit in with the architectural aesthetic of the building. Client: Abscis Architecten (Gent, Belgium).
